

Chain Stitch

Come up to the front of the fabric, and then pull the needle back down again in the same spot, or really close to it – but **DON'T PULL THE THREAD ALL THE WAY THROUGH!**

Pull the thread through to the front a little way down – and pull the needle and thread through the 'circle' of thread that you've left. Don't pull too hard, if you'd like a 'rounded' chain stitch.

If this is the only chain stitch you're doing, and not a full chain of chain stitches, to finish it, push the needle through the fabric just on the other side of the rounded chain.

If you're doing a chain, you don't want to finish the stitch, but effectively create another chain stitch – so, push the needle through the fabric in the same place it has come out.

Continue in this way until you've created a chain in the length that you'd like.

This photo shows that you can create a chain in wiggly lines as well.
The photo also demonstrates that you can play with the length of the 'fixing' stitch – in this example it looks like a leaf!
