

Fly Stitch

Come up through the fabric with the needle, and then back down again a short way to the side. Before you pull the thread all the way through, come back up with the needle to make a triangle. Pull the thread through.

Go back through the fabric in the same hole, or just a small way away to secure the stitch.

Being Ewe

You can vary the length of the securing stitches (the last stitch that secures it in place), to give it a longer tail.
