

## Algerian Eyelet Stitch

The Algerian eyelet is a simple stitch, but very effective.

Start with a straight, horizontal stitch.

Stitch another straight stitch, bottom up – where the two stitches meet in the middle.  
Stitch a horizontal stitch, with the stitch meeting in the middle – keep each stitch the same size

Then stitch a fourth stitch, making a cross.

Then we carry on with these stitches but at an angle, between your first four stitches.

Beautiful

If there's a hole or space in the middle where the stitches meet, that's ok – that's your eyelet!
