

Moss Stitch

Moss stitch has the effect of little stars.

Start by stitching a straight line in a diagonal from top left to bottom right.

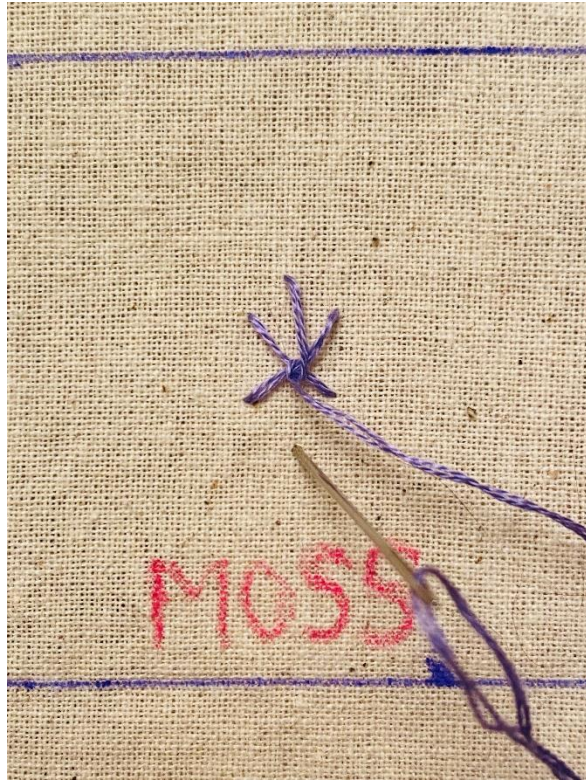

Stitch another diagonal stitch to form a cross.

Then come up at the top of the cross, just above the stitch

Lay the thread in the way in the picture – making a loop below the cross.

Pass the needle underneath the cross, but bring the needle above your loop, for the knot.

Finish the stitch and secure your knot by bringing your needle down below the cross.

Play with the stitches and change the lengths of each stitches, or the width or length.
